General Inspection: Seneral Inspection:	Date:	April 1, 2009 Name: Steven Langseder			
Is the Milnor Street entrance secure? Is the Cottman Ave entrance secure? If Yes, describe in detail below and mark on the attached site map. The fence in the Courtyard along Cottman Avenue was tilted slightly toward Cottman Avenue due to the wind. The fence was repaired during the site visit conducted on April 1st. Site sign remains in good condition? If no, please explain: Are the circuit breakers locked and secured? Are the doors to Building 7 locked? Has security for Building 7 been breached? Is the high visibility fence and welded wire still in place at the front door? Comments: Exclusion Zone: Zone remains well defined (i.e.,construction fence remains intact)? Yes No If no, please specify areas that need to be addressed: The cover on the third (as seen from the eastern return facing west) mattress stockpile was blown from the southwestern corner of the stockpile. The cover on the empty (not filled with stone) mattress stockpile was partially blown from the pile. The covers were repaired on April 1st. Are the fish warning signs still hanging? Yes	Weather	Outroot 45°F			
Is the Milnor Street entrance secure? Is the Cottman Ave entrance secure? Are there any breaches in site security in the site gate/fence? If Yes, describe in detail below and mark on the attached site map. The fence in the Courtyard along Cottman Avenue was tilted slightly toward Cottman Avenue due to the wind. The fence was repaired during the site visit conducted on April 1st. Site sign remains in good condition? If no, please explain: Are the circuit breakers locked and secured? Are the doors to Building 7 locked? Has security for Building 7 been breached? Is the high visibility fence and welded wire still in place at the front door? Comments: Exclusion Zone: Zone remains well defined (i.e.,construction fence remains intact)? Sheet Pile Wall remains in good condition? Marine Mattresses remain covered? If no, please specify areas that need to be addressed: The cover on the third (as seen from the eastern return facing west) mattress stockpile was blown from the southwestern corner of the stockpile. The cover on the empty (not filled with stone) mattress stockpile was partially blown from the pile. The covers were repaired on April 1st. Are the fish warning signs still hanging? Yes	Conditions:	Overcast, 45 F

Additional	Notes:	
Bill B	urke, TtEC, and Steven I	angseder, Malcolm Pirnie, Inc. performed the
week	ly site inspection on Wed	Inesday, April 1, 2009.
At ap	proximately 11:05a.m., A	andy Sinclair of the Pennsylvania Department of
Envir	onmental Protection arriv	ved on-Site. He toured the Site and expressed
gene	ral satisfaction with the e	rosion and sediment control measures, although
some	portions of the silt fence	are beginning to show their age. Mr. Sinclair
was o	concerned about the area	a to the west of the Western Return of the sheetpile
wall b	ecause of its vulnerabilit	y to potential future damage or breaches.
He re	quested that TtEC and N	Malcolm Pirnie continue to monitor this location
during	g the weekly inspections	. I informed him that we would. Mr. Sinclair left the
Site a	at approximately 11:35a.r	n.
